

ISOMontevideo: a tool for monitoring Montevideo Consensus (2013)

«More than 20 years have passed since 1994. We know which the problems are and we know how to solve them.

There is economic growth, there is stability in electoral processes, and we have the legitimacy and resources required to eliminate inequality. There are no more excuses for not doing so.»

This component measures the situation of the countries in three significant indicators for sexual and reproductive health: Maternal mortality rate: maternal death per 100,000 live births (SOURCE: Gender Equality Observatory of Latin America and the Caribbean. UNICEF, United Nations Children’s Fund); Modern contraceptive prevalence rate among women aged 15 to 49 (SOURCE: UNFPA, State of World Population. United Nations Population Division 2014); Percentage of births attended by skilled health personnel (SOURCE: UNFPA, State of World Population. United Nations Population Division 2014).

	Maternal mortality rate	Modern contraceptive prevalence rate	Percentage of births attended by skilled health personnel	Rate of women killed by a current or former partner	Percentage of adolescent women (15-19 years) who are mothers	Percentage of women with unmet need for family planning

This component measures the situation of the countries in some significant indicators of the legislation on sexual and reproductive rights (SRR): Percentage of contents in book or chapter for sexual education and HIV prevention for Basic Primary and Secondary Education (SOURCE: compilation based on a Survey of authorities performed in the First Meeting of Health and Education Secretaries to stop HIV in Latin America and the Caribbean, Public Health Institute of Mexico, UNFPA, UNESCO-2008); National legislation on Integration of sexual education and HIV prevention (SOURCE: idem); Legal status of abortion at national level (SOURCE: «Facts on abortion in Latin America and the Caribbean», Gutmacher Institute, 2012); Degrees of protection by national law from harassment in the workplace and/or education centers (SOURCE: Report of the Inter-American Commission of Women of the OAS, 2012); National legislation on gender identity and registered sex (SOURCE: Compilation based on «LGBT laws worldwide» Amnesty International, 2014); National legislation on same-sex union, marriage and adoption (SOURCE: compilation based on «LGBT laws worldwide», Amnesty International and «Laws of the world that affect gays, lesbians and transgender individuals», ILGA, 2006).

ISOMontevideo is a tool for monitoring Montevideo Consensus, approved by the governments of the 38 countries that attended the I Regional Conference on Population and Development in Latin America and the Caribbean. August, 2013.

It served to reinforce the validity of the objectives and goals raised 20 years ago in Cairo in relation to the Sexual and Reproductive Rights connected to development.

The design and implementation of ISOMontevideo expresses the desire of the AFM and the Feminist Work Group to monitor the progress in the implementation of the governmental commitments in the region, and to reinforce the leadership of women in forums for discussion and agreement.
