

**10** THESIS  
TO ADDRESS  
DEBATES AND  
POLICIES  
TOWARDS THE  
SOCIETY OF CARE

# 1.

***In the face of the environmental and care crisis, the debate must be framed in a proposal for the sustainability of life.***

# 2.

***Debates on care can only be done by considering time and the use of time as political and philosophical axis.***

***The notion of care  
is polysemic and  
under construction.***

**3.**

# 4.

***Inequalities in Latin America and the Caribbean are expressed in territorial injustices and space use.***

***The social experiences of resistance to capitalist destruction of bodies and territories contain a vast wealth of collective ways to strengthen the social fabric based on cultures of cooperation and care.***

**5.**

# 6.

***The burden of care tasks vary according to different exploitation and oppression systems.***

# 7.

***A feminist policy on care must question the place assigned to women in a patriarchal and neoliberal society.***

8

***Community care is a form of citizen participation.***

# 9

***Women caretakers must be at the center of the policies.***

# 10.

***There is no care policy  
without a cultural change.***
